

NEW TEACHING AIDS ON THE MARKET.

`WristAssist` and `TossAssist` are two new products on the Irish market, which could well be of interest to your players. The agency in Ireland is held by one of our own members, **Johnny McCormack**. If

you would like to explore how to market these new devices among your client base, please give Johnny a call on **087 6698 116**.

WRISTASSIST:

“This revolutionary tennis training device can help improve your forehand, backhand and volleys by training your brain and locking in the perfect stroke into your muscle memory.

HOW IT WORKS.

Sophisticated design results in a powerful, yet easy-to-use tennis stroke trainer. The WristAssist positions your wrist perfectly to consistently square the racket face to the ball on every shot. You'll improve the mechanics of your tennis stroke quickly as you groove a perfect swing path with your racket - time after time - and deliver powerful, crisp shots”.

TOSSASSIST:

“No one ever had a great serve without a great ball toss!

The TossAssist lays your wrist back to the correct angle and creates a stable wrist/hand position to accurately and repeatedly lift your ball toss to the same spot.

The Toss Assist will help you:

- Develop a perfect toss - The key to building a great serve that stands up under pressure.
- Develop a consistent tennis ball release height - When you release the ball at eye level every time you can confidently unlock a powerful acceleration of the racket service motion up through the ball.

- Develop a “quiet” laid-back wrist/hand position - which accurately places your ball toss out in front of your serving shoulder.
- Develop a smooth tossing rhythm - (*Throw Slow*) which allows the whole arm to lift the ball into the air rather than flipping or jerking the ball with the wrist or fingers”.
